

NO JAB, NO PAY.
NO JAB, NO PLAY.

PARENTS FOR SAFE VACCINES!

The parents of Australia will continue to protest Australia-wide and bring together a growing army of people... until the Australian government engages with them and addresses their urgent vaccine safety concerns!

WE DEMAND THE IMMEDIATE ESTABLISHMENT OF AN INDEPENDENT VACCINE SAFETY COMMISSION. THIS WILL ESTABLISH THE FOLLOWING:

- **INDEPENDENT SAFETY TESTING** of the current vaccine schedule. To look at the current combination of vaccines and their ingredients -THIS has never been tested for safety!
- **INDEPENDENT SCIENTIFIC ENQUIRY** into the autoimmune diseases being caused by aluminium adjuvants in vaccines in specific groups of individuals. (1)
- **INDEPENDENT LONG-TERM HEALTH STUDIES** of vaccinated vs unvaccinated children
- **LEGISLATION THAT ALL MEDIA OWNERS**, and their board members, must declare their conflicts of interest, particularly pharmaceutical, in all their publications/websites. Rupert Murdoch owns the Daily Telegraph and around 52 billion dollars worth of media worldwide. The Murdoch Press Daily Telegraph has openly taken credit for establishing the Australian No Jab No Pay legislation. (2) (3)

On the 9th of June, 2017, your NSW State Government met with Malcolm Turnbull in Hobart for COAG. Turnbull's objective was to get all the States to adopt the No Jab No Play legislation for childcare. Suggestions are that after this No Jab No School is next on his agenda. This means all 45+ vaccines by adolescence will be pushed on your child, plus any new vaccines the government decides to add...there will be NO choice. Not if you want to use childcare, preschool, and eventually... school. So get active now!

ATTENTION ALL AUSTRALIANS! UNVACCINATED CHILDREN ARE NOT A THREAT TO VACCINATED CHILDREN! AUSTRALIAN IMMUNISATION EXPERT EXPLODES THE MYTH!

Professor Peter McIntyre, Director of the National Centre for Immunisation Research and Surveillance at Westmead Children's Hospital, announced recently:

- *"It is a bit of a myth that there are these terrible disease risks that other children who in the childcare, would be exposed to from an un-immunised child."*
- *"Even if you did get an introduction of measles in childcare, it actually isn't a risk to those fully immunised kids who are in the child care."*
- And regarding pertussis vaccine *"but we also know that they are not that great against mild pertussis getting a cough and they do wear off, so even with 100% of kids getting immunised against pertussis, pertussis unfortunately still circulates in the community."* (4)

SWEDEN BANS MANDATORY VACCINATIONS! PLEASE LISTEN ALL AUSTRALIAN POLITICIANS!

"Sweden has boldly decided to ban mandatory vaccinations citing both "serious health concerns" and the violation of each citizen's constitutional rights to choose their own healthcare. Well done Sweden." (5)

VACCINE INJURIES ARE REAL - AND IGNORED IN AUSTRALIA

America has VAERS - The Vaccine Adverse Events Reporting System - over half a million reports with the data accessible to the public. They also have VICP - The National Vaccine Injury Compensation Program - this has paid out billions of dollars for vaccine damage. What does Australia have? The TGA - This is industry-funded and they eventually send vaccine injury reports on to the pharmaceutical companies that made the vaccine! Is this good enough for our children? (6)

NO JAB, NO PAY.
NO JAB, NO PLAY.

PARENTS FOR SAFE VACCINES!

ORGANISATIONS THAT PROVIDE INDEPENDENT INFORMATION ON VACCINE SAFETY AND EFFICACY*:

AUSTRALIA

* INDEPENDENT means the above organisations are not funded by the pharmaceutical industry or the government. All governments have extensive conflicts of interest with the pharmaceutical industry - especially within their vaccine advisory committees and boards. The main political parties owe their survival to powerful media owners that will only support them if they promote vaccines.
